

## Battery Information

PLEASE RETAIN THIS INFORMATION FOR FUTURE REFERENCE.

- Non-rechargeable batteries are not to be recharged;
- Rechargeable batteries are only to be charged under adult supervision;
- Rechargeable batteries are to be removed from the toy before being charged;
- Different types of batteries or new and used batteries are not to be mixed;
- Batteries are to be inserted with the correct polarity;
- Exhausted batteries are to be removed from the toy;
- The supply terminals are not to be short-circuited.

Always :

- Make sure battery compartments are secure.
- Use batteries of the correct size and type.
- Fit batteries correctly observing the plus and minus marks on the battery and compartment.
- Replace a whole set of batteries at one time.
- Remove dead batteries from equipment.
- Remove batteries from appliance that will not be used again for a long time.
- Please remember that small button cells and AAA batteries should be kept away from young children as they could be easily swallowed. Seek medical advice if you believe a cell has been swallowed.

Never :

- Mix different types of batteries.
- Mix old and new batteries.
- Dispose of batteries in a fire.
- Attempt to recharge ordinary batteries.

Consumers have a significant role to play in reducing the impact of waste electrical and electronic equipment on the environment, you can help by re-using or recycling such equipment.

The crossed out wheellie-bin symbol indicates that the product & batteries must not be disposed of in domestic waste as they contain substances which can be damaging to the environment and human health. If you cannot re-use or recycle the product or batteries, please use designated collection points, or civic recycling facilities to dispose of them.

# Remote-controlled *Tyrannosaurus rex* instructions

## About the Natural History Museum

The Natural History Museum is home to around 70 million specimens, and looks after one of the world's most important collections of natural history. It is an irreplaceable record of the planet's astonishing diversity. Every year, more than three million people visit the Museum, making it a vibrant, fun, buzzing place in which to discover the natural world.

It began as the natural history department of the British Museum in the 1700s, but soon outgrew the buildings in Bloomsbury. In 1881, the present building in South Kensington was opened, a world-famous construction designed by Alfred Waterhouse using groundbreaking materials and techniques.

Inside, the wonders continue. From the fossil-filled *Dinosaurs* gallery to the living exhibition of the *Wildlife Garden*, the Museum explains and investigates all aspects of the natural world. Massive natural forces shape the world in *Earth's Treasury* and *The Power Within*. Living things interact in the *Ecology* gallery and in the hands-on *Investigate Centre* visitors can touch, weigh and examine thousands of real specimens. The Darwin Centre shows some of the Museum's 70 million specimens, and the libraries hold the largest collection of natural history books in the world, including more than one million printed books and 500,000 original drawings, paintings and prints.

But far from being a dusty building full of dead things, the Museum is a vibrant scientific organisation, the largest in the UK. About 300 scientific staff work here furthering our knowledge of the natural world, tackling global issues such as threats to wildlife and the causes of disease.

Sales of this product support the Natural History Museum.

## Tail assembly

2

## How it works

Insert batteries into the handset.

The *T. rex* is controlled by the simple to use remote control handset. Just press the leg button to make the dinosaur walk and the head button to make your *T. rex* roar like a real dinosaur.

## Battery installation

Operates on 3 x AA/LR6 batteries (included for try me function only).

## Troubleshooting

If the product fails to work properly, try replacing the batteries.

If after replacement the product continues to malfunction, reset the hand unit by inserting a paper clip into the small hole located on the back of the hand control near the battery compartment (refer to illustration).
